PROJECTS

ResQlink : Smart Kidnap Detection and Emergency Alert System

Technologies: Python, Flask, MongoDB, Machine Learning, YOLO, OpenCV, Twilio API

- Developed a web application that activates emergency alerts through voice commands and ensures travel safety with real-time monitoring.
- Integrated YOLO-based weapon detection and automated alerts (Email & SMS) for quick response.

Cyberbullying Detection

Technologies: Python, Logistic Regression, Flask, NLP, Scikit-learn

- Built an ML model to detect cyberbullying in text using Logistic Regression & NLP.
- Achieved high accuracy in classification, enabling real-time predictions via a Flask-based API.

MindScribe

Technologies: Python, Django

- Developed a secure web app for journaling, mood tracking and counseling using Django.
- Integrated real-time analytics and feedback monitoring for mental well-being.
