PROFILE

Computer Science graduate with experience in software development through internship and projects. Strong foundation in backend development, software engineering, database management, and machine learning. Skilled in developing reliable, maintainable, and scalable software solutions with a focus on clean architecture and problem-solving.

SKILLS

- Python
- MongoDB
- Flask
- Machine Learning
- Pandas
- Proposal & Report Writing
- Leadership
- Event Management
- Collaboration
- Content Writing & Documentation

INTERNSHIP EXPERIENCE

Python Developer Intern, Reverttech IT Solutions

06/2025 – 06/2026

- Developed multiple Python and Flask-based web applications with scalable backend architecture.
- Designed and implemented REST APIs, authentication modules, and backend functionalities for web applications.
- Developed database-driven features using MongoDB, including CRUD operations, data validation, and efficient data management.
- Integrated machine learning models into web applications to enable real-time prediction and intelligent decision-making.
- Implemented form validation, file handling, and role-based access control to enhance application functionality and security.

PROJECTS

ResQlink - Smart Kidnap Detection and Emergency Alert System

Technologies: Python, Flask, MongoDB, YOLO, Twilio API

- Developed a Flask-based emergency response web application with voice-triggered alerts, travel safety monitoring, and one-tap SOS functionality.
- Integrated YOLO and OpenCV for real-time weapon detection and image capture during emergency situations.
- Implemented automated SMS and email notifications with location details and nearest police station information using the Twilio API.
- Designed MongoDB databases to manage user profiles, emergency contacts, and travel sessions

JobConnect

Technologies: Python, MongoDB, Flask

- Developed a role-based job portal supporting administrators, recruiters, and job seekers with secure authentication and authorization.
- Implemented job posting, application management, resume upload, and application tracking functionalities with automated email notifications.
- Designed MongoDB collections for user management, job postings, and application records, enabling efficient data storage and retrieval.
- Developed backend modules for recruiter approval workflows, form validation, search functionality, and dashboard management.

Cyberbullying Detection

Technologies: Python, Logistic Regression, NLP, Pandas, Flask

- Developed a machine learning model using Logistic Regression and NLP techniques to classify cyberbullying content from text data.
- Performed text preprocessing, feature extraction using TF-IDF vectorization, and model training for text classification.
- Evaluated model performance using accuracy, precision, and recall metrics to assess classification effectiveness.
- Integrated the trained model into a Flask application to provide real-time text classification through a web interface.

EDUCATION

B.Tech in Computer Science and Engineering , APJ Abdul Kalam Technological University, Sahrdaya College of Engineering and Technology, Thrissur	2021 – 2025 CGPA : 8.23
Higher Secondary Education , Vivekodayam Boy's Higher Secondary School, Thrissur	2019 – 2021 96.16%
Secondary Education , High School Anthikkad, Thrissur	2018 – 2019 95%

CERTIFICATIONS

Python for Data Science , NPTEL	01/2024 – 02/2024
--	-------------------

LEADERSHIP EXPERIENCE

Secretary , IEEE Sahrdaya SB	2024
- Managed official documentation and coordinated student branch activities. - Led proposal writing initiatives, resulting in multiple event approvals. - Served as Documentation Lead for the 3-day international flagship event TechX Infinia.	
Secretary , IAS - IEEE Sahrdaya SB	2023
- Managed documentation and coordinated society events. - Volunteered at the 3-day national flagship event ALTAIR 2.0, supporting event coordination and documentation.	

ACHIEVEMENTS

Six Pillar Award , IEEE Sahrdaya SB	2025
--	------
